ABOUT

Flutter Software Engineer with 5+ years of mobile development experience, specializing in cross-platform Flutter development for Android, iOS and Web. Experienced in building production applications for fintech, retail, ERP and fitness domains, including white-label products, reusable architectures and App Store/Google Play deployments.

EXPERIENCES

● August 2026
Present
at [Omniway](#)

OMNIWAY Studio

Software Engineer & Product Developer

- App websites:** [PrayBefore.app](#), [writereal.app](#), [povrataknaselo.app](#)
- Developing and launching mobile and web applications with **Flutter for Android, iOS and Web**.
 - Working on products including Povratak na Selo, with **6,000+** users, WriteReal, an **AI text humanizer**, and Pray Before, a live prayer and Bible app.
 - Taking products from idea to production, including architecture, feature development, integrations, deployment and ongoing improvements.
 - Implementing **RevenueCat** subscription payments, **Firebase Analytics**, **Crashlytics**, **Google Sign-In** and **Apple Sign-In**.
 - Integrating **OpenAI API** and **Gemini API** into applications and building AI-powered features.
 - Researching markets and competitors to identify product opportunities and better understand potential users.
 - Working on marketing and distribution, including ASO, social media content and user acquisition.

MobileXApp (DBAN) – White Label Fintech App

Flutter Software Engineer

- Developing a **white-label fintech mobile application** from the ground up for a Swiss banking client as part of a **10-member team**.
- Integrating Flutter UI with backend services and working across **reusable components** and custom libraries that form the application's core functionality.
- Working with **modular libraries** for device binding, configuration, theming and other shared functionality, enabling functionality to be independently maintained and versioned across projects.
- Contributing to a **reusable and highly configurable application architecture**, allowing new banking clients to be onboarded and customized quickly without rebuilding the application from scratch.
- Following a **structured Flutter project architecture** with dedicated layers for pages, widgets, atoms, molecules, notifiers, providers and shared constants, promoting consistency and maintainability.
- Collaborating with Flutter developers, backend engineers, designers and QA to deliver production-ready features.

Karen - Data Consolidation White Label App

Flutter Developer

- Led the development of **Android and iOS** applications using **Flutter**, transforming an existing web application into a **cross-platform** mobile solution within a **four-member team**.
- Developed a **white-label app architecture** supporting three distinct client applications, enabling customization and scalability for diverse client needs.
- Implemented **Continuous Integration and Continuous Deployment (CI/CD) pipelines** with **GitHub Actions**, automating the build process for all three apps and streamlining deployment to testers.
- Integrated **Firebase Crashlytics** to monitor and enhance app stability, and implemented **push notifications** to notify users.
- Utilized **Riverpod** for state management, ensuring a robust and **maintainable codebase** with efficient state handling across multiple client apps.

Alfies - Warehouse ERP System and Mobile App Store Application

Android Mobile Developer

- App website:** <https://www.alfies.at/>
App Google Play Store link: <https://play.google.com/store/apps/details?id=at.alfies.store&hl=en>
- Led the development of native Android apps for a **warehouse ERP** system (250 users) and a **general store app (50,000 users)**.
 - Contributed to a four-member team, transforming a glitch-prone ERP system into a seamless experience, reducing issues by 25%.
 - Improved app's stability **from 90% to 99% issue-free** users based on **Crashlytics**.
 - Introduced **barcode scanning** for the warehouse app, enhancing tracking accuracy by 30% and inventory management efficiency by 20%.
 - Utilized **XML** and **LiveData** for layout and real-time updates, achieving a 15% improvement in synchronization and responsiveness.

Skenit - Gym Management app

Native Android Mobile Developer and Flutter Developer

- App website:** <https://skenit.com/>
- Collaborated with a **seven-member team** for a seamless development lifecycle.
 - Empowered personal trainers and gym owners to efficiently manage facilities, schedules, and monitor activities.
 - Implemented user-centric features, including QR code check-ins and training program calendars.
 - Implemented **Amplitude** for user activity insights.

● 2019 - 2021

Web developer

Freelance

As a web developer, I crafted engaging and responsive websites using **HTML**, **CSS**, **JavaScript**, **PHP**, and **WordPress**.
Specializing in freelance projects, I **translated client requirements** into visually appealing and functional web solutions.
Proficient in developing **user-friendly interfaces** and ensuring seamless user experiences across various projects.

TECHNOLOGY STACK

- Mobile:**
Flutter, Dart
- State & UI:**
Riverpod, BLoC, Material Design, Cupertino Widgets
- Backend & Services:**
OpenAI API, Gemini AI API, Firebase (Auth, Firestore, Storage, Crashlytics, Analytics, FCM), REST API, WebSockets
- Deployment:**
Android, iOS & Web, Google Play, App Store, Netlify
- Analytics & Monitoring:**
Firebase Analytics, Crashlytics, Amplitude
- Tools:**
Git, Git Flow, Android Studio, Xcode, IntelliJ IDEA, Cursor, Jira
